

N-TERCEPT

MANURE STABILIZER

N-tercept is a complex biological solution to liquid manure management

COMPONENTS

1. The liquid base of the N-Tercept formulation is the lifeblood and energy source of the biologicals.
 - Elevates the biological counts and keeps them there (unique to this product- most boost and then crash)
 - Very high affinity for stabilization of Ammonia
2. Biologicals
 - Bacteria that liquefy the solids in the solution and some specific to DDG which are unique to this formulation
 - Organic decomposers that break down lignin and cellulose
 - Enzyme production

BENEFITS FOR PRODUCERS

- Ammonia and Sulfur are trapped in the solution reducing emissions and increasing fertilizer value of the manure – also reducing odor by up to 70% (Iowa St)
- More fluid and better mixing of the manures aids in more even distribution in the field
- Tanks and pits empty easier and solids are reduced
- Reduced flies as the product removes the crust from the surface
- Compatible with all manures

APPLICATION GUIDELINES

- Use 5 gal per 800 sows per month
- Use 2.5 gal per 800 finishers per month
- Use 10 gal per 800 cows per month
- Shock treatment on lagoon 250 gal per 5 million gal

For best results allow 30 days after treatment before ANY removal.
